### SUMMARY

Full Stack Developer with hands-on experience building and deploying scalable MERN + Firebase applications used by 100+ users. Proven ability to deliver under pressure through 7+ hackathons, translating business ideas into robust, production-ready web platforms. Skilled in crafting seamless user experiences, optimizing performance, and integrating AI and APIs to drive real-world functionality.

### EDUCATION

ITM SKILLS UNIVERSITY - KHARGHAR  
Bachelor of Technology in Computer Science

2024-2028

### SKILLS

- Languages: JavaScript (ES6+), Python, Java, C++
- Frontend: React.js, Tailwind CSS, Responsive Web Design
- Backend: Node.js, Express.js, RESTful API Development, Firebase
- Databases: MongoDB
- Tools & Platforms: Git, GitHub, AWS, Vercel, Netlify
- Concepts: API Integration, UI/UX Principles, Agile Development

### EXPERIENCE

Full Stack Developer Intern – Hari Om Thalassic PVT. LTD.

JULY 2025 - DEC 2025

- Developed and maintained full-stack web application features using JavaScript, React.js, Node.js, and MongoDB.
- Built responsive user interfaces and integrated REST APIs for seamless frontend-backend communication.
- Collaborated with cross-functional teams to design, test, and deploy scalable web solutions.
- Implemented debugging and performance optimization to improve application reliability and efficiency.
- Utilized Git/GitHub for version control and followed Agile development practices during the development lifecycle.
- Assisted in database operations including data modeling, querying, and API integration.

### PROJECTS

#### Spendr – Fintech Web Application

Team Project | Tech Stack: MERN (MongoDB, Express.js, React.js, Express.js), Firebase

- Built a gamified fintech platform enabling 100+ teens to track expenses, set goals, and simulate stock trading.
- Integrated an AI-powered financial advisor and paper-trading engine via Firebase Cloud Functions.
- Optimized authentication flow and caching logic, improving onboarding speed by 35%.
- Live: [Landing Page](#) | [App](#)

#### CampusCare – Intelligent Campus Safety Platform

Individual Project | Tech Stack: HTML, CSS, JavaScript, Firebase (Firestore, Cloud Functions, FCM, Authentication)

- Designed a real-time SOS alert system that reduced emergency response time by ~40% during testing.
- Implemented secure, role-based dashboards for security, staff, and admin users using Firebase Cloud Functions.
- Deployed a mobile-first web app accessible across devices, improving accessibility and usability for end users.
- Live: [campus-care-pi.vercel.app](#)

### CERTIFICATIONS

#### AWS APAC – Solutions Architecture Job Simulation | Forage | Issued: June 2025

Designed 3-tier scalable web app using AWS CodePipeline & S3; implemented CI/CD workflow.

#### Goldman Sachs – Software Engineering Job Simulation | Forage | Issued: October 2024

Solved data structure challenges & optimized code aligned with production-grade standards.
